- 10 Year Limited Warranty-Best in Class!
- 48 hour Shipments on all standard products
- 24 hour or less guaranteed Sales response on all quotes and order tracking

NEW PRODUCT !!!

LoadMaster

Darnell-Rose has developed another new product to improve the load capacity on low profile applications. Designed using the same tried and true dimensional configuration as our renowned XH and XAE wheel, we are proud to introduce the *LoadMaster*.

This Glass Filled Nylon (GFN) wheel has been extensively tested to provide 225 lbs. of load protection per wheel. Combine it with the high-quality dual wheel Darnell 32 series caster yoke, and you are guaranteed a load of 450 lbs. per caster under normal conditions. No other low-profile caster matches the strength and performance of the 32 series caster from Darnell-Rose.

Wheel Properties:

85 Shore D (+/-5) Durometer Glass Filled Nylon
-20 F to 475 F intermittent, 30-minute intervals
